

Crafts -to- GO

August 2026

Sunflower Coaster

Provided in the kit:

- 2 Cork Circles
- 2 Pieces of Jute Twine
- 2 Pieces of Yellow Yarn
- 2 Pieces of Brown Yarn

(Optional) You'll need to provide:

- Hot Glue

Instructions:

1. **Begin forming the base.** Peel off the protective sheet to expose the sticky side of the cork. Using the jute twine, start a spiral and to attach it to the sticky cork base in the center.

Continue to attach the twine adjacently by forming a coil towards the outer edge of the base. Keep increasing the size until you're happy with the pattern. (Note: leave about $\frac{1}{4}$ - $\frac{1}{2}$ inch space. You want your petals to flow over the edge of the cork.) *Optional: Use hot-glue gun to attach the twine to the cork.*

2. **Complete the Center.** Grab a strand of brown yarn and add a border around the previous twine attached to the base. *Optional: Use hot-glue gun to attach the yarn to the cork.*

3. **Form the Petals.** Take the yellow yarn and create a small loop and attach the open ends to the base just at the brown yarn. Each loop will form a petal for your sunflower coaster. Keep creating loops and attaching them to the base border until the entire border is filled. There are enough materials provided to make two Sunflower Coasters. *Optional: Use hot-glue gun to attach the yarn to the cork.*
