

Provided in the kit:

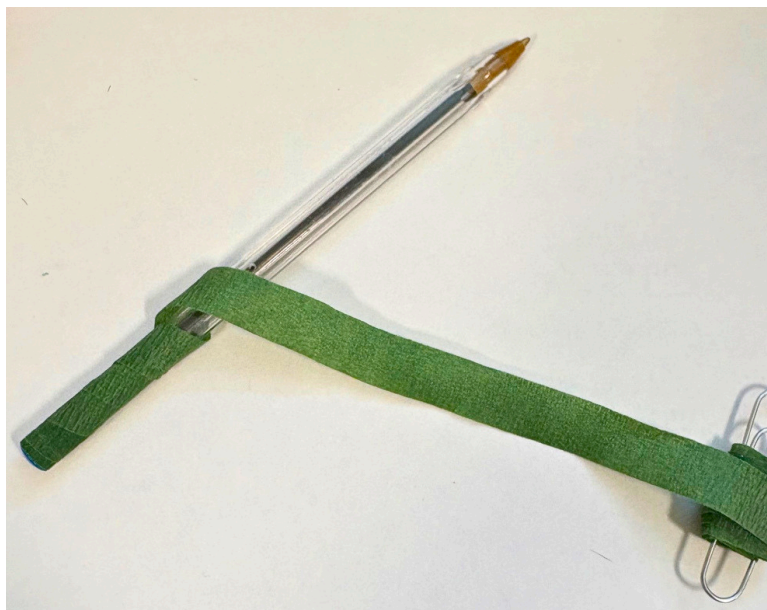

- Fake Flower
- Ball-Point Pen
- Floral Tape

Optional: You'll need to provide:

- Glue - hot glue or tacky works best

Instructions:

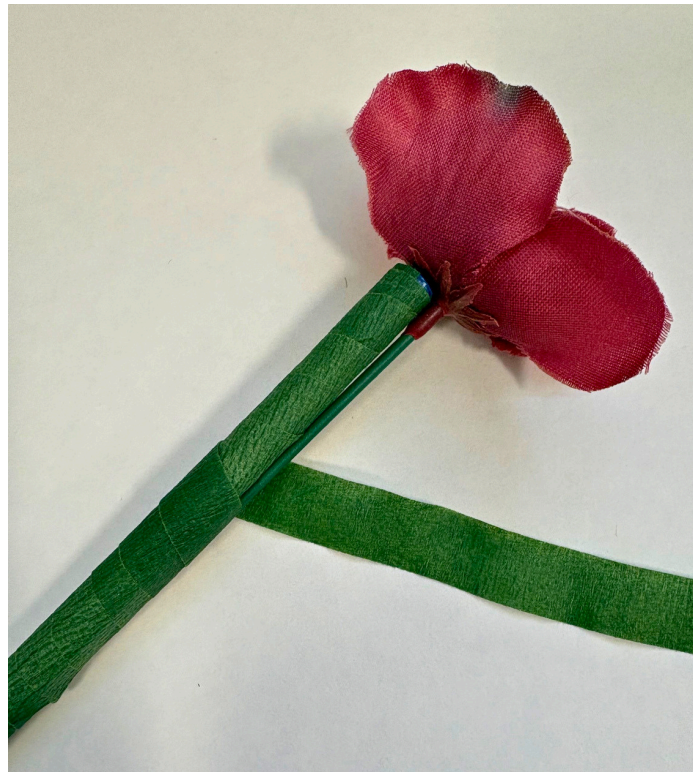

1. **Prepare the materials.** Start by removing the pen cap. You won't be able to recap the pen when finished, but ballpoint pens typically do not dry out easily.
2. **Begin wrapping the pen.** Starting at the top of the pen, wrap the floral tape around the pen while lightly stretching the tape as you go. Continue wrapping all the way down to the tip of the pen.

3. **Attach the flower.** Once you reach the tip of the pen, line the flower stem up with the top of the pen. Begin wrapping the floral tape back up the pen, securing the flower stem to the pen as you go.

4. **Continue wrapping.** When you reach the top again, reverse direction and wrap back down the pen. Continue wrapping up and down the pen until it has been wrapped a total of 2–3 times, making sure the tape is smooth and secure throughout.

5. **Finishing the pen.** Once finished, cut the tape and press the end firmly into the wrapped tape, smoothing it as you go. *Optional: Add a small dot of glue to further secure the end of the tape.*
